

Questions to consider

What is the goal of radiation for me, and how much does it lower my risk in absolute terms?

Will my heart be in the treatment field, and what will you do to protect it?

Could I reasonably consider leaving radiation out? What would that mean for me?

Am I a candidate for a shorter schedule, or for partial-breast RT?

Will I need a boost, and what does it add in my case?

Is there a clinical trial I might be eligible for?
